

Absentee Voting

"Absentee" voting is available to registered voters who will be out of the county on Election Day.

Also, if a registered voter is unable to go to the polls due to disability or if employment keeps a voter on the job site the entire time the polls are open (7AM until 7PM) and this is verified by the employer, this is a valid reason for absentee voting.

Applications for absentee voting can be requested by the voter in person or by phone. Even an immediate family member may request an application be sent to a voter. Once the voter returns the application, the ballot will be mailed for voting and then must be returned to the Voting Office no later than the close of polls on Election Day (7PM) in order to be counted.

Persons who are 65 years of age or older may vote by the absentee method if they wish to do so and properly apply.
